Turning Back Time

If time is on your side, then how can it be your worst enemy? Aging is inevitable, but its effects are sometimes difficult to accept. From crow’s feet and puffy eyes to sagging skin and double chins, no one looks forward to looking older. Fortunately, plastic surgery is no longer a lifestyle for the rich and famous. The continual advances in technology provide more options for patients, and what was once an opportunity for the wealthy is now available to people from all walks of life.

Dr. Burke Robinson and his staff at Robinson Facial Plastic Surgery can help turn back the hands of Father Time, making you look as good as, if not better than, you feel. With over 19 years of experience, Dr. Robinson is a nationally recognized, double-board certified leader in facial plastic and reconstructive surgery. While Dr. Robinson’s patients value his expertise and extensive training, his sincere demeanor makes them feel relaxed. According to Marie Tillery, patient coordinator for Robinson Facial Plastic Surgery, “Patients feel comfortable with Dr. Robinson because he listens to them intently and then determines which procedure is best from his perspective as a surgeon.” She continues, “He explains the surgical information in a way that makes sense to patients – they feel safe with him.” With so many options available, Dr. Robinson is attentive to each patient’s needs and desires, ensuring that he or she receives the best possible results.
Robinson Facial Plastic Surgery offers state-of-the-art procedures and innovative treatments, including in-office fillers to smooth over fine lines and wrinkles. Whether you wish to remove excess skin from your upper eyelids or take advantage of one of the newest procedures – the mid-facelift – Robinson Facial Plastic Surgery employs the latest methods to prevent and correct imperfections, leaving every patient looking and feeling like a new person. Inside Dr. Robinson’s office is a skin care clinic, Visage, where licensed Esthetician Heather Davis has been with Dr. Robinson for over seven years. Heather specializes in products and procedures to improve your skin’s appearance, including microdermabrasion, various chemical peels, and medical grade skincare treatments. “I’m proud to be able to bring skill, knowledge and seamless collaboration to helping clients look and feel their best,” comments Heather.

With impeccable credentials and respect amongst his peers, Dr. Robinson’s skill and expertise, coupled with his approachable personality, are creating a buzz in the community. Because he performs surgery only on the face, he is highly specialized in facial plastic and reconstructive surgery, and has a keen eye to a very natural look. Suzy Heer, a patient of Dr. Robinson, says, “I had plastic surgery for no one else except the woman staring back at me in the mirror. It undoubtedly put a little lilt in my step!” The staff is knowledgeable, having also had procedures done by Dr. Robinson and able to talk about their experiences to patients firsthand.

While growing older is unavoidable, looking older is preventable. At Robinson Facial Plastic Surgery, you will receive the personal attention and specialized care that you desire. Face it: Time may never be on your side, but your face doesn’t have to prove it!
